The **GN01** study is a new clinical research study from Eli Lilly and Company. It will test if an investigational medicine (a medicine being studied) is safe and could reduce weight in people with obesity or overweight.

Can I join this study?

Yes, you may be able to join the study if you:

- Are aged 18 to 75 years
- Cannot become pregnant
- Have a BMI of 27kg/m² or more
- Do not have diabetes
- Have not taken part in a clinical research study for weight loss in the past year

BMI stands for body mass index. It is a number that compares a person's weight to their height. It can be used to tell if a person may be at risk of some health conditions.
